

Project Overview

Marina Vista Residences is a 42-storey waterfront tower rising on the last remaining plot along the Dubai Marina promenade, developed by Azure Bay Developments. The tower comprises 318 residential units ranging from studios to three-bedroom sky villas, with the 1BR collection occupying floors 9 through 30. Construction commenced in Q1 2025 following completion of the shared podium with the adjacent Azure Bay Retail Walk.

The building is designed by the same architectural practice behind two of the Marina's most recognised towers, with a curved glass facade intended to maximise both marina and sea views. Azure Bay Developments is positioning Marina Vista Residences as a premium but attainable entry point into the Marina compared to older stock, with fully fitted kitchens and smart-home wiring included as standard rather than as a paid upgrade.

At launch, 61% of inventory was allocated to the 1BR and 2BR collections, reflecting anticipated demand from both end-users and buy-to-let investors. The remaining units are studios and larger three-bedroom and penthouse configurations on the top eight floors.

Unit Specifications — 1BR Collection

The 1BR units in Marina Vista Residences range from 720 to 810 sqft, with the standard mid-floor layout (Unit Type 1B-04) measuring 750 sqft including a 68 sqft balcony. Each unit includes one master bedroom with an en-suite bathroom, a separate guest powder room, an open-plan living and dining area, and a fully equipped kitchen with integrated European appliances.

Floor-to-ceiling windows run the full width of the living area, and units on the odd-numbered floors above level 15 are oriented to capture uninterrupted marina views rather than the neighbouring tower's service wing. Flooring throughout is porcelain tile in living areas with engineered timber in the bedroom.

Each 1BR unit is allocated one covered parking bay in the podium and one storage locker on the same floor as the unit. Ceiling height is 2.95m, above the Marina norm of roughly 2.7m for comparable-era towers.

Amenities & Lifestyle

Residents have access to a 45-metre infinity-edge pool on the 6th-floor podium level overlooking the marina channel, a separate children's pool, and a fully equipped fitness centre with a dedicated yoga studio and sauna. A co-working lounge with private call booths is included for residents working from home.

The podium level also houses a landscaped garden, a padel court, and direct pedestrian access to the Marina Walk promenade without needing to cross Al Marsa Street. A concierge desk operates 24 hours, alongside valet parking for visitors.

Ground-floor retail includes a supermarket unit, a specialty coffee operator, and two restaurant units, all pre-leased ahead of handover according to Azure Bay Developments' leasing update circulated to registered investors in March 2026.

Developer Track Record

Azure Bay Developments has delivered four residential towers in Dubai Marina and Jumeirah Beach Residence since 2014, totalling approximately 1,650 units, with a stated on-time delivery record of three out of four projects handed over within four months of the original contractual date.

The developer's most recent completed project, Azure Bay Tower 3, was handed over in Q2 2024, seven weeks behind its original Q4 2023 target, which the developer attributed to finishing works on the shared retail podium rather than the residential floors themselves.

Azure Bay Developments is privately held and discloses project-level escrow account numbers registered with the Dubai Land Department on its investor portal, consistent with standard RERA escrow requirements for off-plan sales in Dubai.

Location & Connectivity

Marina Vista Residences sits approximately 350 metres from Dubai Marina Mall and a six-minute walk from the DMCC Metro Station on the Red Line. The Dubai Tram's Marina Towers stop is closer still, roughly 220 metres from the building's main entrance, connecting residents to both the tram and onward metro interchange.

Sheikh Zayed Road access is via Al Sufouh Road, roughly four minutes' drive from the building's basement exit during off-peak hours. Dubai Marina Yacht Club and the wider Marina Walk retail and dining strip are within a ten-minute walk.

Dubai International Airport is approximately 35 minutes by car under normal traffic conditions, while Al Maktoum International Airport in Dubai South is approximately 40 minutes via Sheikh Zayed Road.

Investment Highlights

Azure Bay Developments cites Dubai Marina's constrained new-supply pipeline as a key demand driver for Marina Vista Residences, noting that no new waterfront plots have been released for sale in the immediate Marina district since 2021.

The developer's internal leasing comparables, based on similarly sized 1BR units in neighbouring towers completed within the last three years, suggest achievable rents in the range of AED 120,000 to AED 140,000 per annum at current market conditions, though PropertyDoc notes these are developer-supplied comparables and should be cross-checked against independent market data.

Marina Vista Residences is scheduled for handover in Q4 2027, with the developer's marketing materials citing construction progress of approximately 22% as of Q2 2026.
